Recycling PODS

A unique, cost effective way to
store and remove rubbish

Introduction

Recycling Pods are a unique way to store and remove rubbish. Perfect for slow moving sites or sites that are sensitive on space or image.

We can install a Recycling Pod for you anywhere on your site. One of the benefits of the Pod is that you are only invoiced for what is removed by the cubic yard. Collections are completed at your request; however we ask for at least 3-4 collections per year.

We currently have hundreds of Recycling PODS in local schools and care homes

“Revolutionised our waste management”

Christy Adetola (Head of Marketing Avery Group Support Centre)

“Implementing Waste King’s Recycling Pods has revolutionised our waste management approach, providing not only cost savings but also enhancing the aesthetics and efficiency of our care homes. With a standardised pricing model and comprehensive waste removal services, Waste King has exceeded our expectations.

The transition from skips to Recycling Pods has not only optimized our space but also significantly reduced our carbon footprint. Their commitment to environmental sustainability aligns perfectly with our values at Avery Healthcare. Waste King’s detailed reporting ensures transparency and allows us to make informed decisions to further improve our waste management practices.

Partnering with Waste King has been a game-changer for us, allowing us to focus more on providing exceptional care to our residents while contributing to a cleaner, greener future.”

We are the only company in UK to provide Recycling PODS

Cost effective waste management

- More cost effective than skip hire
- Can be installed anywhere on site
- Free waste management plans allowing you to comply fully with the environment agency and report your green credentials.
- Two man teams are uniformed, insured and licensed to go anywhere on the premises to remove your items.
- Even heavy items can be collected from wherever it is on your site!
- Allows you to store any waste safely (including hazardous)
